

ETL Project Proposal

1. Topic:
 - a. Video Games
2. Description
 - a. We will be scrapping and exploring data off Metacritic, VGChartz and to bring back the best rated, best sold, video games by release date, and platform.
3. Sources
 - a. <https://www.metacritic.com/browse/games/score/metascore/all/all/filtered>
 - b. [Video Game Sales | Kaggle](#)
 - c. https://vgsales.fandom.com/wiki/List_of_best-selling_video_games
 - d. <https://www.businessinsider.com/best-video-games-metacritic-2017-11#50-world-of-goo-2>
4. Inspiration:
 - a. When this boot camp ends and if adulting life slows down we'd love to just kick back and play some video games like in the old days. But we haven't gotten to game in so long we don't know what the best games out there are.
5. Roles
 - a. Ebrahim:
 - i. ERD Diagrams
 - ii. ERD Documentation
 - b. Cody:
 - i. ETL Notebook
 - c. Malachai:
 - i. Queries,
 - ii. CREATE TABLE
 - d. Markeis:
 - i. TBD
 - e. All:
 - i. Web Scrapping, Technical Report,
6. Database Design:
 - a. We want our database to reflect the top rated and top sold video games by platform and by their release date.
